Pflueger's Fish Hook Extractors or Disgorgers

No. 3, Brass, Nickel Plated

Exact Size

No. 2, Malleable Iron, Bright XC Plated

Exact Size

No. 1, Brass, Nickel Plated

Exact Size

It is the experience of anglers that many a fish, especially large ones, will take the hook or bait well into their stomach, making it necessary to cut the fish open to get the hook out. This can be avoided by using any of the above disgorgers. Directions: Place the line between the flanges of the disgorger, draw it moderately tight, and run the instrument down into the bend of hook, then clasp the line against the side of the shaft and push the whole down until the bait is disengaged, when the hook will readily come out with the disgorger.

No. 1.....	Price per gross	\$30 52
" 2.....	" "	14 73
" 3.....	" "	5 70

Pflueger's Shoo Fly Cream

A positive protection against the Black Fly, Mosquito, Midges and other insects.

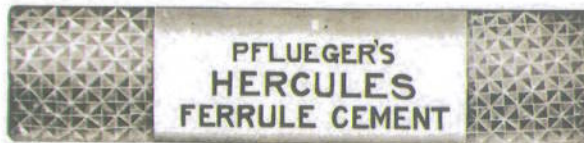

No. 1285

This preparation is a decided improvement over all others. It contains no tar or animal fat, leaves no stain, is clean, easily applied, washes off readily, leaves the skin soft, smooth and free from irritation, so common with other preparations. It relieves inflammation and pain from sunburn and if used in time will prevent the burning.

No. 1285. Cream in glass pots. Per gross \$31 60

Pflueger's "Hercules" Ferrule and Rod Cement

Just the thing to cement Ferrules on; also to repair broken rods, etc.

No. 283—Price per gross sticks.....\$12 60

PFLUEGER'S TROLLEY RIGS

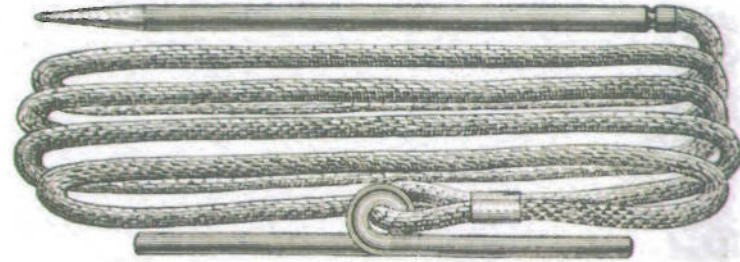

A heavy Lead Anchor is tied to a line of proper strength and thrown into the water as far as you desire. This line known as the Anchor Line (see cut) is made fast to the shore or pier when it is ready for the Split Fork Trolley. On the solid Fork Trolley the anchor line is first passed through the fork and under the pulley before it is made fast. The advantage of the Split Fork Trolley is, it can be readily placed on and taken off without untying the anchor line. To fasten a trolley line (see cut) to the eye of the trolley, tie quantity of hooks at proper intervals and bait them, let the trolley into the water to the desired depth and await developments.

Set No. 340 contains 1 solid brass fork trolley, one 10 oz. lead anchor, Doz. sets \$3 15
 " " 341 " 1 split " " " " 10 " " " " 6 30

Each Set packed in a wooden slide cover box.

PFLUEGER'S FISH STRINGERS

HERCULES STRINGER

Cut Shows Half Size

Made of heavy braided cord, 6 feet long and securely fastened to the brass needle, leaving no projection to interfere with stringing the fish. The brass bar is made of extra heavy wire, a very safe fastener for the reason that if the bottom fish cuts off, the next one is securely caught.

No. 1890 6-ft long Price per gross \$25 26
 Packed—Each Stringer wrapped in tissue, one dozen in a fancy box.

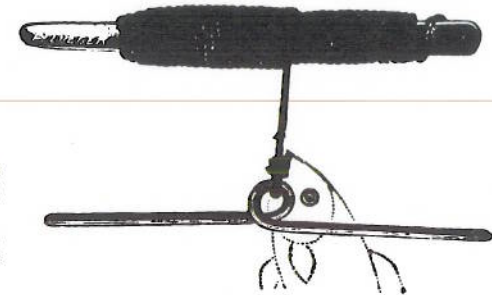

Braided Line Stringer

No. 805

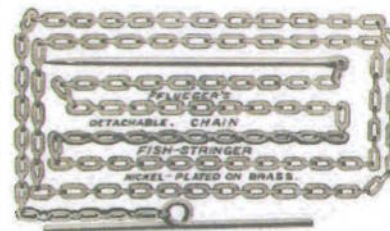

Cut Shows Half Size

No. 805 XIC Per gross \$5 56
 With heavy braided mottled cotton line.

Pflueger's Fine Quality, Hard Rubber, Round, Salt Water Reel

With Aluminum Metal Interleaved, Multiplying, with Adjustable Back Sliding Click
Patented

Cut shows actual size, 150 yard

We mention a few of the many advantages this patented reel has over the old construction.

The aluminum metal interleaved with the hard rubber on the side plates adds greatly to the strength of the reel, prevents splitting and warping of the rubber, reduces the weight of reel and greatly beautifies it.

Bushings, collars, crossplate and other attachments are fastened direct to the aluminum plate thereby relieving the possibility of coming loose or breaking out.

Reel is constructed with Phosphor bronze bearings. Stubb's steel pivots. German Silver spool. Pillars, Crossplate and Crank. Hard rubber handle.

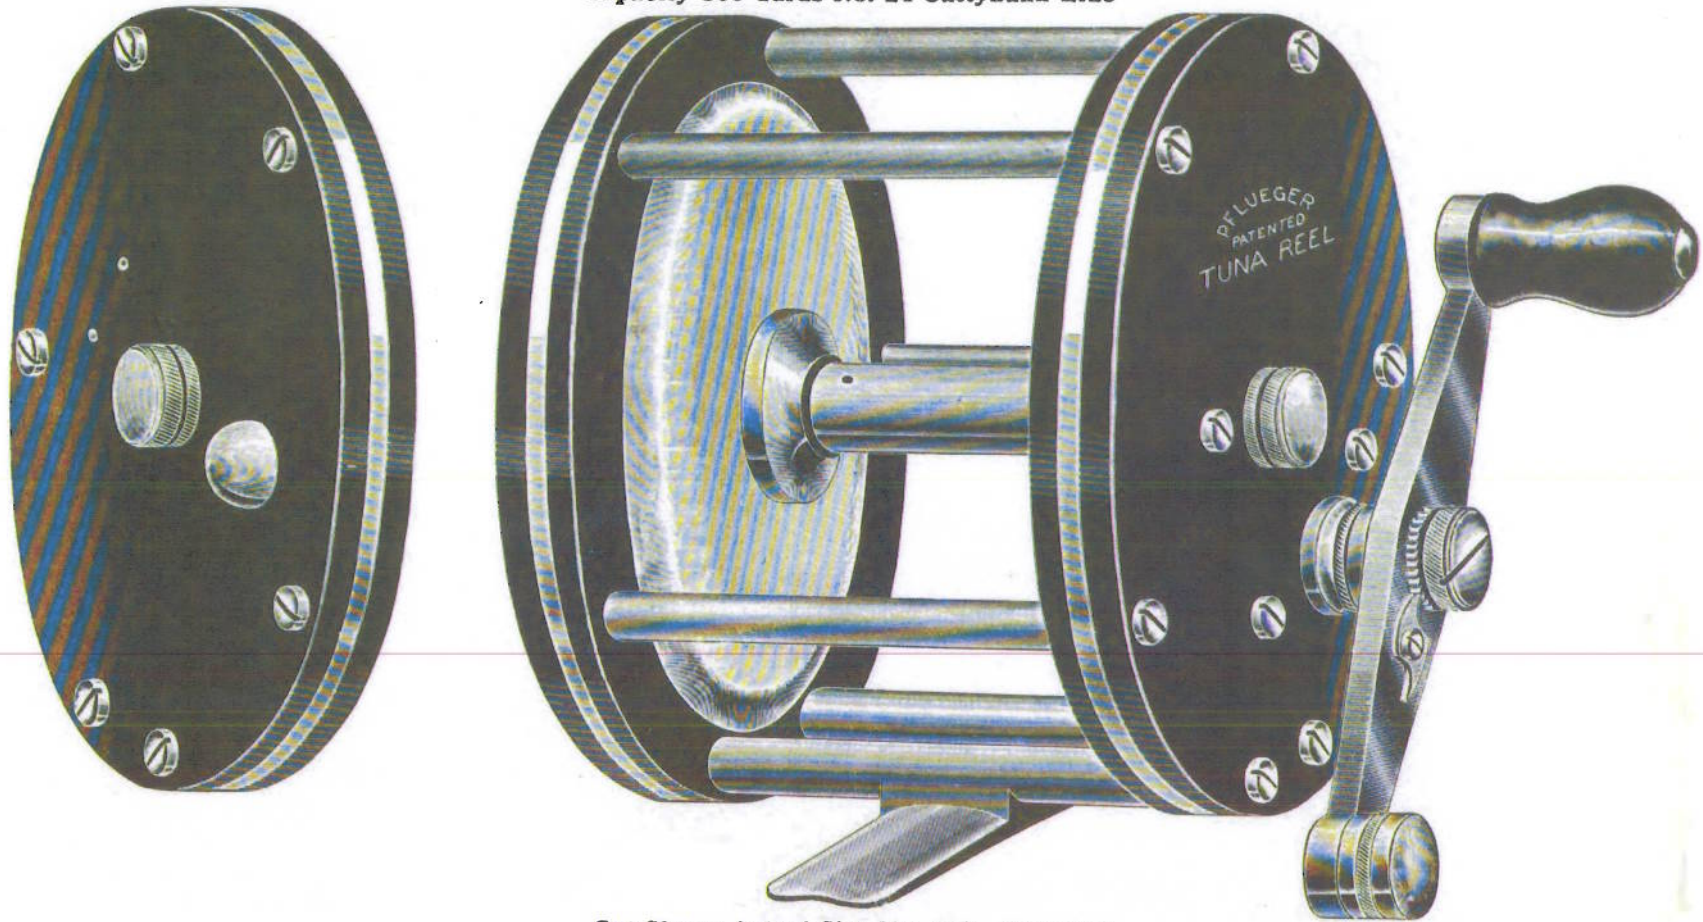

No.	Yards.	Pillar.	Disk.	Each.

PFLUEGER'S HARD RUBBER TUNA REEL, MULTIPLYING WITH ADJUSTABLE BACK SLIDING CLICK

Capacity 300 Yards No. 24 Cuttyhunk Line

Cut Shows Actual Size No. 710. Patented

This reel is especially designed to meet the demand for a powerful reel and the terrific strain of a Tuna rush. The side plates are made of extra fine quality hard rubber interleaved with a sheet of aluminum metal which is exposed on the edge of the plate, and the beautiful polished white aluminum in contrast with the polished black rubber produces a most pleasing effect, and not alone this, but the aluminum also prevents the warping or splitting of the rubber, reduces the weight of the reel and many other advantages of minor importance. The bushings, collars, cross plate and other attachments are fastened direct to the aluminum metal plate, thereby getting the full strength of the metal, which is many times stronger than the old way of fastening to the hard rubber. This reel has the following construction: Phosphor Bronze Bearings, Stubb's Steel Pivots, German Silver Spool, Crossplate, Pillars and Crank. The crank has a ratchet lock which prevents the same coming loose. We fully guarantee this reel.

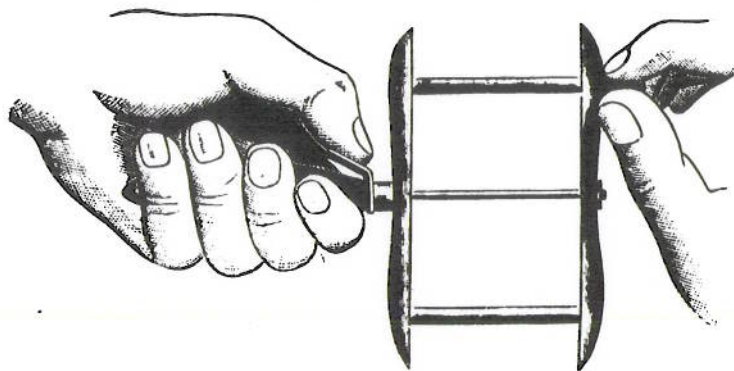

No. 710. Capacity 300 yards, No. 24 Cuttyhunk Line. Price each, \$33.68.

Packed—One reel in a chamos lined leather case, one case in an extra strong card box.
